THE FRANCIS CRICK INSTITUTE
UNDERGRADUATE STUDENT PROGRAMMES 2017

Exceptional penultimate year undergraduate students at UK universities are invited to apply to our Crick Sandwich or Crick-Calleva Summer Student Programme, both starting in July 2017.

The Francis Crick Institute (the Crick) is a world class interdisciplinary biomedical discovery institute. Our scientists aim to carry out creative and ambitious research investigating fundamental questions of biology relevant to human health and disease.

The Crick is a consortium of six of the UK’s most successful scientific and academic organisations - the Medical Research Council, Cancer Research UK, the Wellcome Trust, UCL, Imperial College London and King’s College London. This breadth of research experience allows our scientists to address major problems using a wide variety of approaches from disciplines including biology, physics, chemistry, mathematics and engineering. Crick students benefit from well-resourced research labs and state-of-the-art science technology platforms, excellent scientific and transferable skills training, and a supportive and stimulating research environment.

The Crick has a multinational outlook, and is proud to be a diverse, open and international institute, with students and staff from over 70 countries.

THE CRICK SANDWICH STUDENT PROGRAMME 2017

The Crick sandwich student programme provides outstanding undergraduate students who have completed their second year at a UK university with one year of experience working on a defined research project. Students are hosted in our research groups and science technology platforms, receiving training in a range of biomedical techniques and experience of a dynamic and collaborative research environment. Students will receive funding to the equivalent of the London Living Wage while they are at the Crick.

For further information about the Crick Sandwich Programme, sandwich projects, eligibility and how to apply, visit: https://www.crick.ac.uk/about-us/jobs-and-study/sandwich-students/

Application deadline: Sunday 5 Feb 2017
Interviews: Friday 24 March 2017

THE CRICK-CALLEVA SUMMER STUDENT PROGRAMME 2017

High calibre and motivated penultimate year undergraduates interested in a research career are invited to apply for our 8-week summer student programme. Summer students will have the opportunity to gain ‘hands-on’ research experience working on a defined research project in one of our research groups. Summer Students will receive funding to the equivalent of the London Living Wage while they are at the Crick.

For further information about the Crick-Calleva Summer Student Programme, summer projects, eligibility and how to apply, visit: https://www.crick.ac.uk/about-us/jobs-and-study/summer-students/

Application deadline: Sunday 12 Feb 2017
Interviews: Monday 10 April 2017
